

**ALLERGEN GUIDE**

This sheet identifies the major allergens present in our restaurant. Any other allergen should be brought to the immediate attention of a manager. Our restaurant is currently Peanut, Shellfish, and Crustacean free and therefore those allergens are not listed here. Our only Menu item containing Fish is our Tuna Melt.

The oil used for the majority of our menu is a blend of Olive, Rice Bran, Avocado, and Grapeseed Oils. Pizzas with no listed sauce (Margherita and Brussels) use olive oil. Our Fryer oil is either canola or corn oil, but due to mixed use will contain gluten.

We proudly make, cut, and roll out our dough in house. This means that there may be a small trace of flour in any of our products. Those with mild or moderate celiac can be accommodated but those with severe flour allergies may not be satisfied.

We use Udi's gluten free buns which contain egg. We use Gordon Choice cauliflower crust which contain egg. We use Daiya vegan cheese which contains none of the major 8 allergens.

All vinegar contains a low amount of sulfides. Any of our vinaigrette will therefore be an issue for those with a severe sulfide intolerance.

All Pizza toppings except for cheeses are free of the major 8 allergens. All of our milk based cheeses contain only dairy as major allergen

<b>MENU ITEM</b>	<b>WHEAT</b>	<b>MILK</b>	<b>TREE NUTS</b>	<b>SOY</b>	<b>EGGS</b>	<b>NOTES:</b>
Potato Chips						seed allergen (sunflower oil)
Truffle Fries, no aioli						aioli listed below
